Introduction

SharePoint PDF Wizard is the simple, fast and clean way for conversion of files into different file formats from within SharePoint. SharePoint PDF Wizard is feature packed and allows you to automatically generate and output the documents to a user specified SharePoint document library.

You can also create Templates with Pre-set Configuration Settings to perform operations on specific SharePoint document library files on a single click and/or Triggered by an Event!

How does SharePoint PDF Wizard Work?

After you have added the SharePoint PDF Wizard App, the PDF Wizard Option will now be available for all library documents within a site.

Select your source Word or Excel or PowerPoint or PDF document from SharePoint Document Library.

With SharePoint PDF Wizard you can now select operation to perform on selected documents and automatically create output file directly from the Ribbon Menu (PDF Wizard) or files Context Menu.

Customize the file name and specify the SharePoint document library to store the automatically generated documents.

SharePoint PDF Wizard Uses:

Do you need to convert your documents into PDF or merge multiple PDF's into one? or do you want to promote the professional image of your organisation by adding watermarks? or do you want to encrypt / decrypt and/or digitally sign your important business files stored in a SharePoint Document Library? With SharePoint PDF Wizard you can swiftly perform all of these operations from within your SharePoint Document Library files with absolutely no coding!

SharePoint PDF Wizard Features and Benefits:

- Convert PDF files into Word, PowerPoint, HTML, XML, SVG with NO CODING!
- Save multiple Word, PowerPoint, HTML, Image files as one PDF file.
- Very easy to install. Very easy to use, no training required.
- Tightly integrated into SharePoint. Easy access via Ribbon Menu and Items Context Menu.
- Specify output SharePoint document library and customise document file names.
- One click automatic creation of multiple Documents!
- Merge multiple PDF Files into 1 Single PDF Document.
- Add watermark to PDF Files.
- Save Word, Excel and PowerPoint Documents as .PDF.
- Encrypt, Decrypt or Change Password of PDF file.
- Digitally sign the PDF file.
- Set expiry date for the PDF file.
- Extract text from image
- Split PDF File into Individual Pages
- Extract PDF pages
- Create Templates with Pre-set Configuration Settings to perform operations on specific SharePoint library documents.

SharePoint PDF Wizard Installation (SharePoint Online App)

Types of License

SharePoint PDF Wizard is made available from the Office Store

(<https://appssource.microsoft.com/en-gb/product/office/WA104381401>)

Below is the list of SharePoint PDF Wizard License Types;

Trial

- The Trial License can only be used for a single Site. The Trial will expire after 14 days.

User License

- A User License activates **SharePoint PDF Wizard** functionality to all Libraries within a SharePoint Site for the Users who have a License assigned.

Site License

- A Site License activates **SharePoint PDF Wizard** functionality to all Users and on all Lists within the SharePoint Site to which it is applied.

Installing SharePoint PDF Wizard

1. To add an app from the SharePoint Store
2. Verify that the user account that is performing this procedure is a member of the site Owners group.
3. On the home page, under Get started with your site, click Add lists, libraries, and other apps.
4. If the Get started with your site control does not appear on the home page, click the Settings icon, and click View Site Contents, and then on the Site Contents page, click Add an App.
5. Click SharePoint Store.
6. Browse the SharePoint Store for "SharePoint PDF Wizard".
7. Click the SharePoint PDF Wizard App.
8. Click Details, and then click Trial / Buy It.
9. Follow the steps to log in and purchase the App, if required.
10. In the Grant Permission to an App dialog box, if you trust the App, click Allow Access.
11. The SharePoint PDF Wizard App is now added and appears in the Apps section of your Site Contents list.

How to Use SharePoint PDF Wizard?

Select the required files from SharePoint document library, then select the operation to perform from PDF Wizard dialog box. It will automatically generate and output the generated document/s to a user specified SharePoint document library with customized name.

Using SharePoint PDF Wizard within SharePoint

Once installed SharePoint PDF Wizard options are made available on all SharePoint Document Library Documents Context Menu and the Libraries Ribbon Menu.

Select your source file (Word or Excel or PowerPoint or PDF document) from SharePoint Document Library.

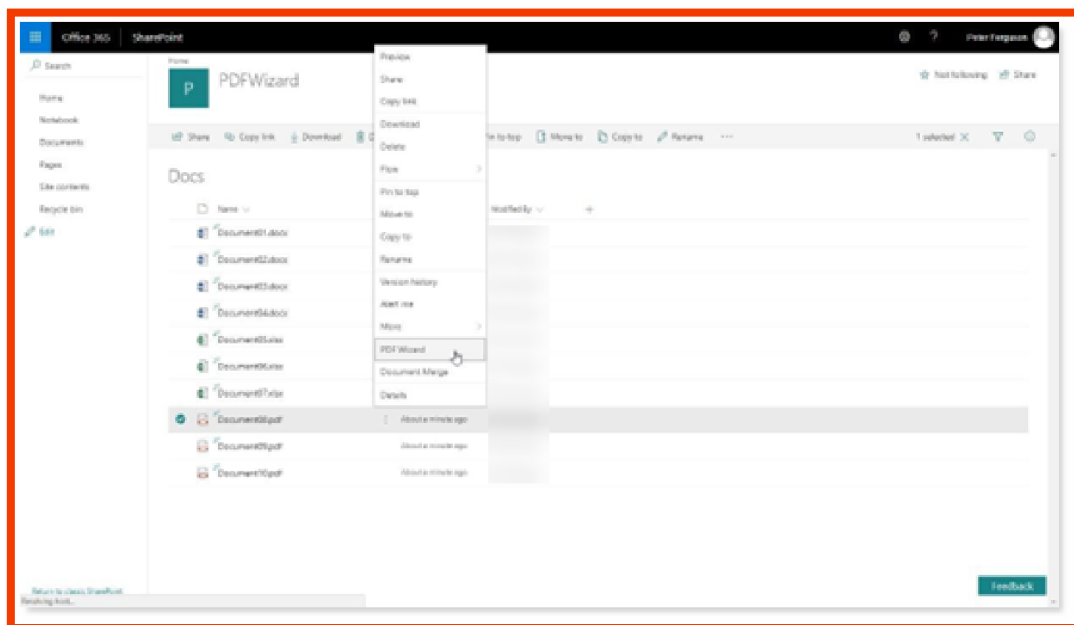

With SharePoint PDF Wizard you can now select operations to perform on selected documents and automatically generate the output file. File selection is done from the Ribbon Menu (PDF Wizard) or the files Context Menu.

Customize the file name and specify the SharePoint document library to store the automatically generated documents.

SharePoint PDF Wizard Operations

Convert PDF To

- This will convert PDF File into another selected format. (DOCX, PPTX, HTML, SVG, XML)
- Go to the required SharePoint Document Library.
- Click on the Context Menu of the Item (Any PDF File) you want to Convert.
- Click PDF Wizard.

- The SharePoint PDF Wizard window will appear. Choose the options as required and click the "Convert" button.

Back to Site

Configuration Options

Select Preconfigured Template: Select a pre-set Configuration Template. Pre-sets are managed via the PDF Wizard App landing page.

PDF Options

Select an Operation to perform: Select related operation to perform with the selected file.

The screenshot displays the PDF Wizard for SharePoint interface. At the top left is the logo. The main area is divided into sections:

- Configuration Options:** A dropdown menu currently showing "No Preconfigured Template".
- Select an operation to perform:** A dropdown menu with a list of operations: "Convert PDF To", "Encrypt", "Decrypt", "Change Password", "Digitally Sign", "Set Expiry Date", "Convert RGB to Grayscale", "Add Watermark", "Split PDF File into Individual Pages", and "Extract PDF pages". The "Convert PDF To" option is selected and highlighted in blue.
- PDF Options (required):** A dropdown menu showing "Select file type to Convert".
- Information (required):** A dropdown menu.
- Source File Table:** A table with two columns: "ID" and "Source File". It contains one row with ID "37" and "OriginalPDF.pdf".
- Select Output Library:** A dropdown menu.
- custom file name (optional):** A text input field.

At the bottom, there are two buttons: "Convert" and "Back to Site".

Show All Sites: Check this option to show all sites in a site collection.

Show Sub Sites: Check this option to Show Sub Sites.

Show Library Sub Folders: Check this option to Show Document Library Sub Folders.

PDF Options (Required)

Select file type to convert: Select the file type into which you want to convert the PDF File.

The screenshot shows the 'PDF WIZARD for SharePoint' interface. The 'Configuration Options' section has a dropdown set to 'No Preconfigured Template'. The 'PDF Options' section has a dropdown set to 'Convert PDF To'. Below this are three checkboxes: 'Show All Sites (In Site Collection)', 'Show Sub Sites', and 'Show Library Sub Folders'. The 'Select Convert PDF To' dropdown is open, showing a list of file types: DOCX, PPTX, HTML, SVG, XML, and PDF/A. The 'Output Information (required)' section has three fields: 'PDF Wizard for SharePoint', 'Select Output Library', and 'custom file name (optional)'. At the bottom are 'Convert' and 'Back to Site' buttons.

Output Information (required)

Select Site for Output Library: Select the SharePoint Site where you want to save the output Word/Excel/PowerPoint Document. Sub Sites will display if the Configuration Option is checked.

Select Output Library: Select the SharePoint Document Library where you want to save the output Word/Excel/PowerPoint Document. Document Library Sub Folders will display if the Configuration Option is checked.

Custom File Name: Enter a Custom File Name as required. By default, the Merged Word/Excel/PowerPoint Document is saved with a file name of the following construct 'TemplateName_BinaryTimeStamp'.

Convert To PDF

- This will convert any Word and/or PowerPoint and/or Excel and/or Image To PDF.
- Go to the required SharePoint Document Library.
- Click on the Context Menu of the Item you want to Convert into PDF.
- Click PDF Wizard.
- The SharePoint PDF Wizard window will appear. Choose the options as required and click the "Convert" button.

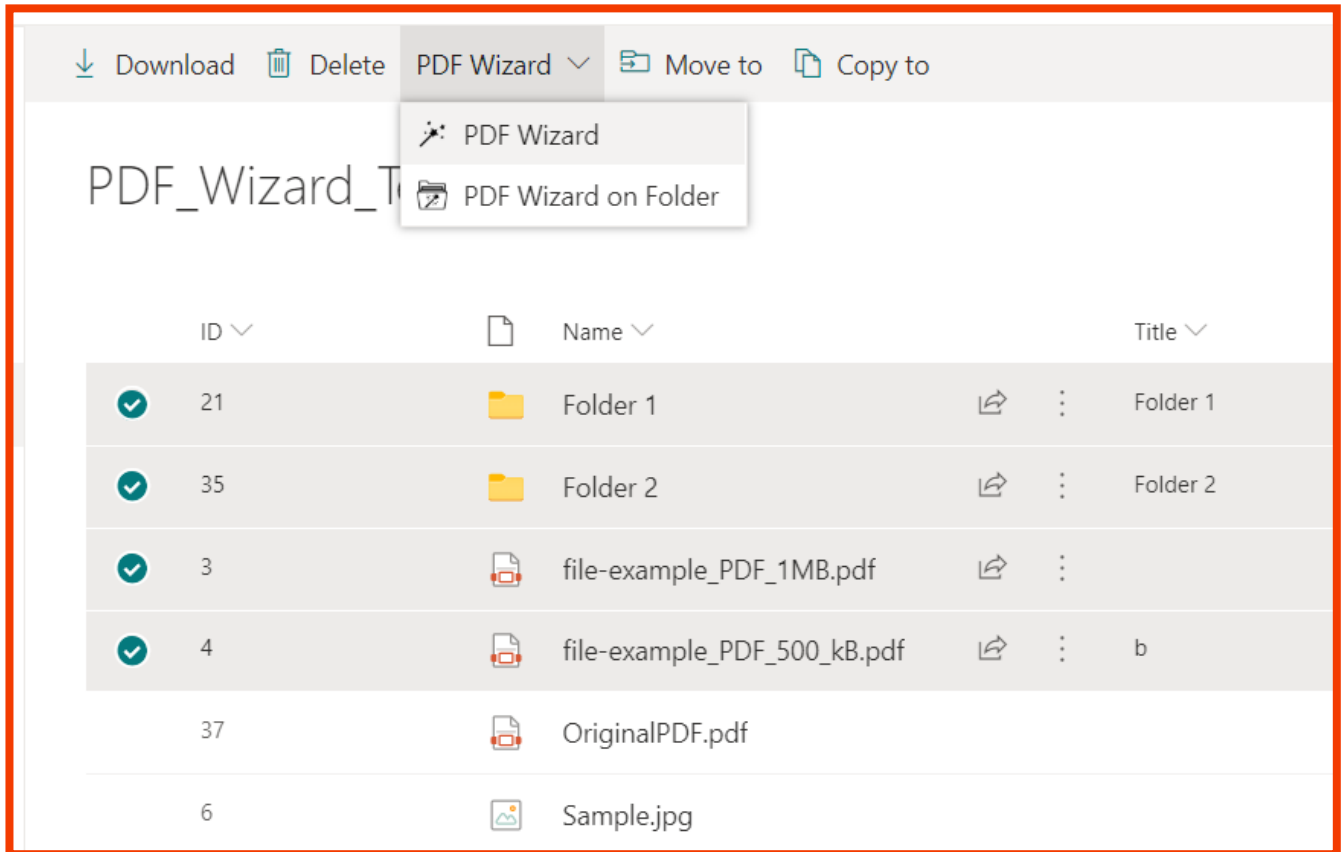

The screenshot displays the 'PDF WIZARD for SharePoint' interface. It features several sections for configuration:

- Configuration Options:** A dropdown menu set to 'No Preconfigured Template'.
- PDF Options:** A dropdown menu set to 'Convert To PDF'.
- Checkboxes:** Three unchecked options: 'Show All Sites (In Site Collection)', 'Show Sub Sites', and 'Show Library Sub Folders'.
- Select Convert To PDF Options (required):** A dropdown menu with a list of file types: DOCX (highlighted), PPTX, XLSX, Images, and HTML. Below this is a list of files: 'SampleNumbers.jpg', 'samplepptx.pptx', and '1 2'.
- Output Information (required):** Two dropdown menus: 'PDF Wizard for SharePoint' and 'Select Output Library'.

At the bottom, there are two buttons: 'Convert' and 'Back to Site'.

Merge PDF files

- This will merge multiple PDF files into one PDF file.
- Go to the required SharePoint Document Library.
- Select the multiple PDF files which you want to merge.
- Select “PDF Wizard” action from the Ribbon menu of the SharePoint Document Library.

- The SharePoint PDF Wizard window will appear. Choose the options as required and click the “Merge” button.

Extract PDF pages

By specifying start page and end page you can extract that pages from a PDF file into new PDF File.

The screenshot shows the PDF Wizard for SharePoint interface. The 'Configuration Options' section has a dropdown set to 'No Preconfigured Template'. The 'PDF Options' section has a dropdown set to 'Extract PDF pages', which is highlighted with a red box. Below this are three checkboxes: 'Show All Sites (In Site Collection)', 'Show Sub Sites', and 'Show Library Sub Folders'. The 'PDF Options (required)' section has two input fields: 'Start Page' and 'End Page', both highlighted with a red box. Below these is a table with the following data:

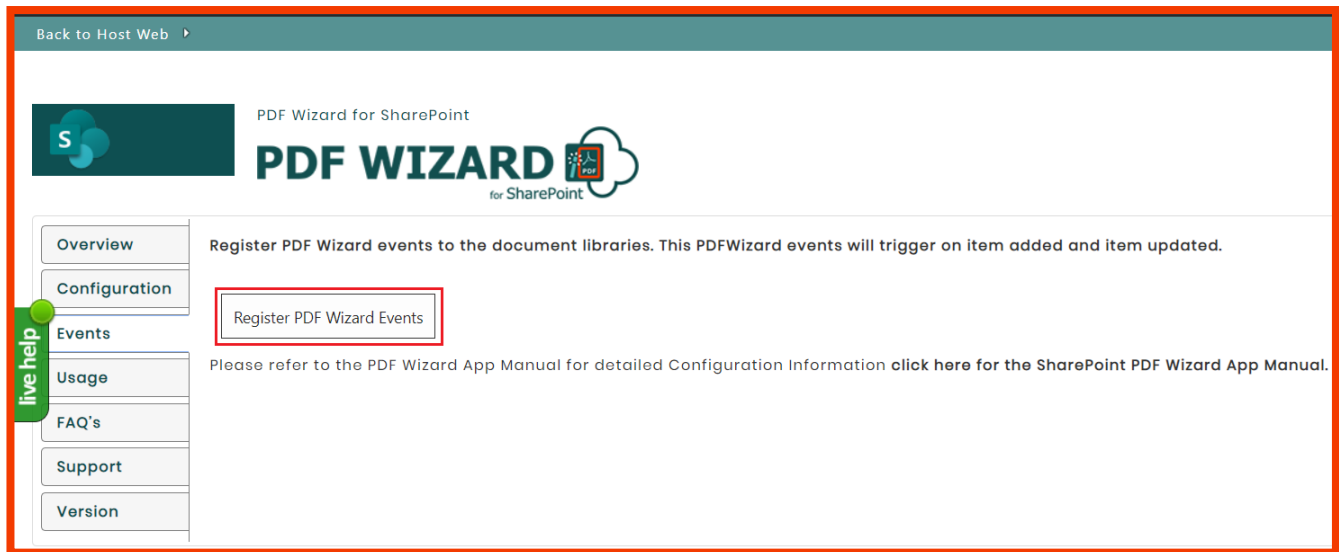

ID	Source File
4	file-example_PDF_500_kB.pdf

The 'Output Information (required)' section has three input fields: 'PDF Wizard for SharePoint', 'Select Output Library', and 'custom file name (optional)'. At the bottom are two buttons: 'Extract' and 'Back to Site'.

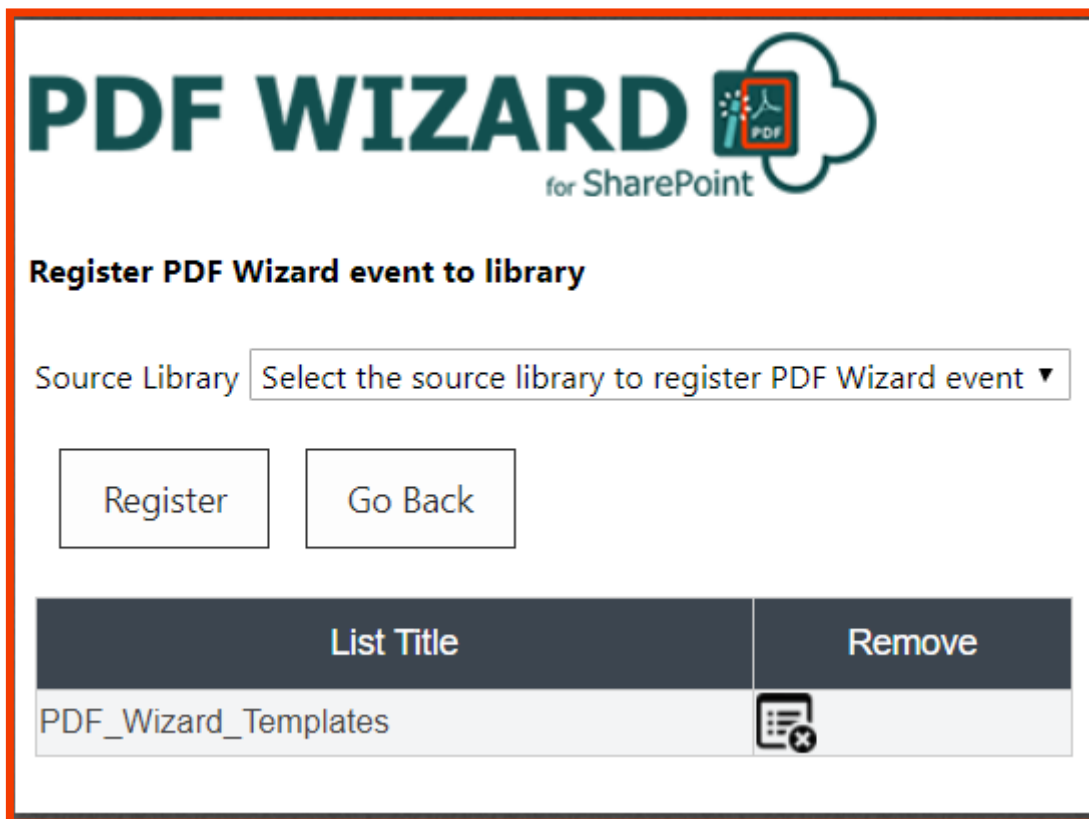

Trigger PDF Wizard events on item added and item updated (Remote Event Receiver Automated Workflows)

Following are the steps to use PDF Wizard App Remote Event Receiver:

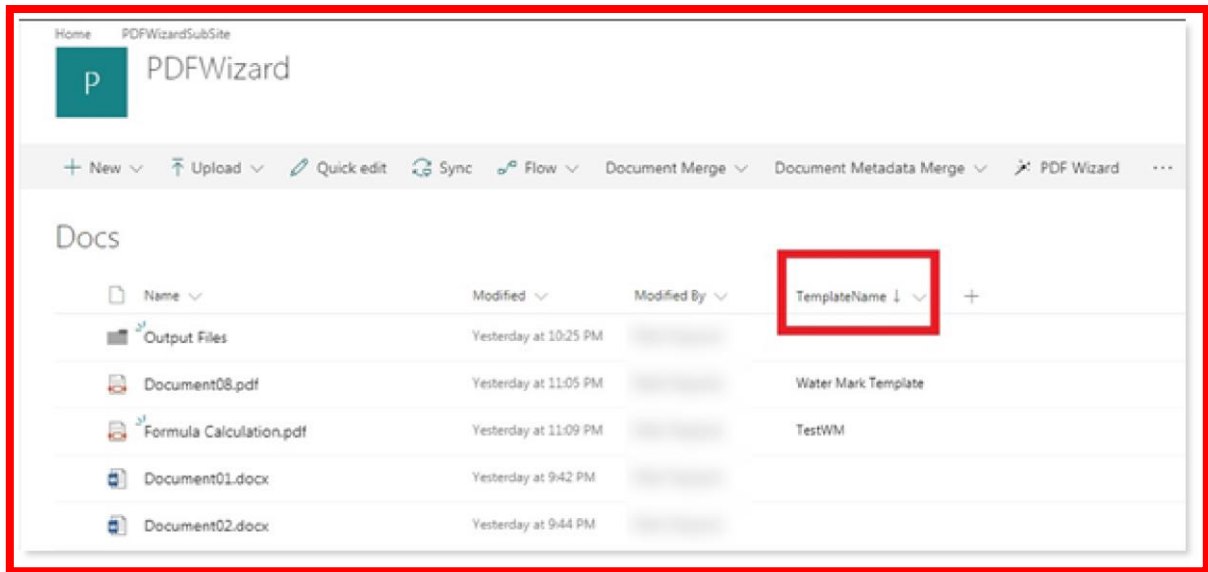

Step 1: Click on PDF Wizard app landing page:

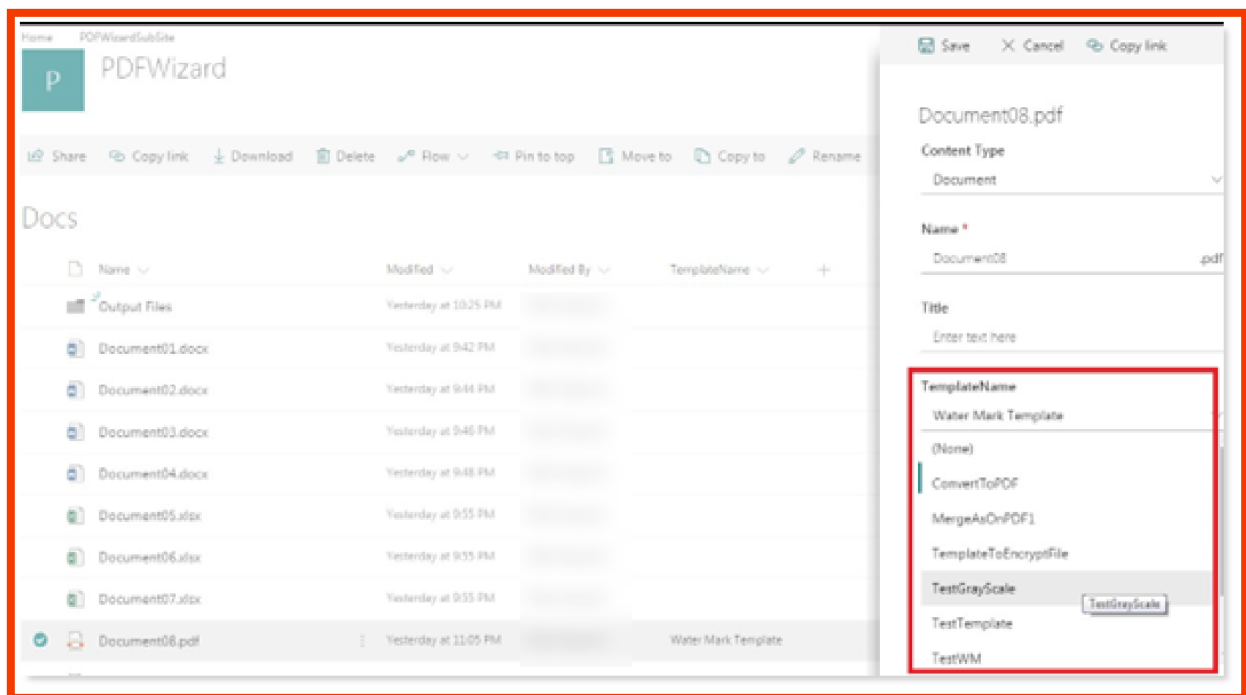

Step 2: Then click on “Register PDF Wizard Events” button.

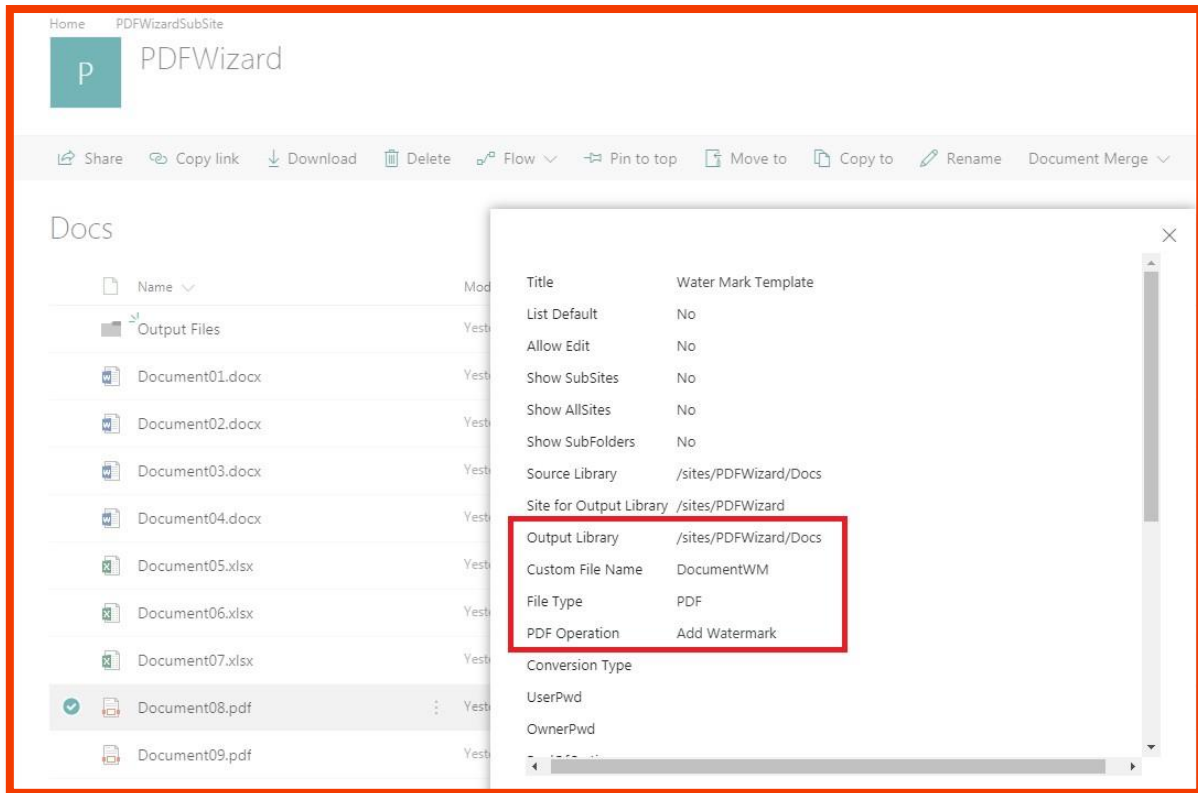

- Here you can register the PDF Wizard event to the specific library on which you want to perform PDF Wizard events.
- It will trigger on item added and item updated.
- It will add one additional column to your library “TemplateName” which will be the lookup of “SharePoint PDF Wizard Pre-set Configuration Settings”.

- Now you are required to select correct template title which you have created, from the dropdown, to get done the correct PDF Wizard operation when you are uploading or editing any item from the Document Library.

Step 3: Whenever you will add/update a file to the library it will generate output document to the destination library.

SharePoint PDF Wizard Operations on Folder

- This feature allows you to merge PDF Files of a folder into a single PDF File.
- You can also merge multiple documents of different types within a folder as a single PDF file.
- You can select multiple folders at a time and that will create on PDF File for each folder.
- Generated file name will be name of the folder and you can also specify the custom file name for example CustomName<<FolderName>>. Here <<FolderName>> placeholder will be replaced by actual folder name for each folder.

Step 1:

The screenshot shows the SharePoint interface with the PDF Wizard menu open. The menu options are:

- PDF Wizard
- PDF Wizard on Folder

The 'PDF Wizard on Folder' option is highlighted with a red box. Below the menu, a table lists the folders to be merged:

ID	Name	Title
21	Folder 1	Folder 1
35	Folder 2	Folder 2

Step 2:

The screenshot shows the PDF Wizard configuration options. The 'Configuration Options' section includes:

- No Preconfigured Template
- Select an operation to perform:
 - Merge PDF Files
 - Merge PDF Files
 - Merge as one PDF
- Show Library Sub Folders

The 'PDF Options (required)' section includes:

- Select 1st Order by eler: Ascending
- Select 2nd Order by eler: Ascending
- Select 3rd Order by element: Ascending

The 'Output Information (required)' section includes:

- PDF Wizard for SharePoint
- Select Output Library
- custom file name (optional)

At the bottom, there is a table of source files:

ID	Source File
5	file-sample_150kB.pdf
1	dummy.pdf
9	Sample.pdf

Buttons for 'Merge' and 'Back to Site' are located at the bottom right.
